Important Information (Safety Advice)

These instructions
must be followed.

This User Guide contains important information for safe use in order to prevent harm to the user and others as well as damage to property.

Please note the following contents (indications and graphic symbols) before reading the main contents of this manual, and follow the instructions given.

- Explanations of Indications

If the product is used incorrectly, the degree of injury or damage that may arise is classified and explained with the following symbols.

 Warning	Indicates a hazard with a level of risk which, if not avoided, could result in death or serious injury* ¹ to the user.	 Caution	Indicates a hazard with a level of risk which, if not avoided, could result in injury* ² to the user or property damage* ³ .
--	---	--	--

- Explanations of Graphic Symbols

Instructions are given in the forms of the following graphic symbols. (Examples of graphic symbols are as follows.)

 DON'Ts: Actions that are prohibited.	 DOs: Actions that must be taken.
---	---

*1 "Serious injury" indicates blindness, injuries, burns, bone fractures, poisoning, or electric shocks which have long term effects and require hospitalisation and/or long-term hospital visits for treatment.

*2 "Injury" indicates injuries or burns which do not require hospitalisation or long-term hospital visits for treatment.

*3 "Property damage" indicates expanded damage that involves the house or household property.

 Warning	
 DON'Ts	<ul style="list-style-type: none">• Do not use near a heating appliance such as a heater. Doing so may cause fire.• Do not place the product on the power cord of an electrical appliance. Doing so may damage the cord, resulting in electric shock or fire.• Stop using this product immediately if it is damaged. Continued use of this product when damaged may result in injury.• Do not assemble this product without parts such as the steel pipes or side panels. Doing so may cause damage or deformation to the product or injury due to insufficient product strength.• Keep small parts such as bolts or felt out of the reach of small children. Failure to do so may result in the children accidentally swallowing them or suffocating.• Do not keep unwanted packaging materials within reach of small children. Infants may accidentally pull packaging materials over the mouth or nose, causing suffocation.
 DOs	<ul style="list-style-type: none">• Fix the product securely onto the wall, ceiling or floor of the building using earthquake-resistant metal fittings or fixing components. If excessive load is placed on the product due to vibrations caused by an earthquake, the product may tip over resulting in injury.• Read the User Guide provided with the Stacking Shelf (Standard Set), and be sure to use the product correctly. This contains precautions for use, which are important for preventing injury and ensuring the safe use of the product.

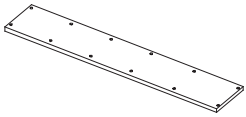

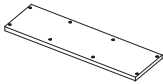

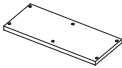

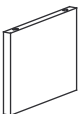

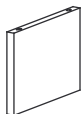

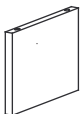

Important Information (Safety Advice)

These instructions must be followed. (Cont'd)

 Caution	
 DON'Ts	<ul style="list-style-type: none"> Do not use unless fully assembled. Fixed parts may become detached, resulting in injury. Use this product only for its intended purpose. Failure to do so may result in an unexpected accident or injury. Do not attempt to repair or modify the product. Doing so may weaken the strength of the product, resulting in injury.
 DOs	<ul style="list-style-type: none"> Ventilate the room well in the beginning of use. Wooden materials that emit as little formaldehyde as possible are used. However, formaldehyde may still remain, and those with chemical sensitivity or infants may experience an allergic reaction. When assembling the product, ensure there is enough space for assembly and then lay a sheet / rug on the floor and other furniture to prevent them from becoming scratched. Be careful not to get fingers or hands caught when assembling and installing the product. When relocating the unit for a move or relocating to a different room, or a different floor, disassemble the unit before the relocation. Failure to do so may result in the joint sections of the steel pipes becoming loose, resulting in damage to the product or injury. Periodically inspect the installation condition of the bolts and steel pipes for looseness, and re-tighten if any looseness is found. Using while loose may result in damage to the product or injury.

Note (Other Cautions)	
	<ul style="list-style-type: none"> Do not store for long periods of time in a hot (approx. temperature 35°C or higher) or dry (approx. humidity 30% or lower) location. Doing so may cause warping, deformation or cracks in the product. Do not expose the product to heat or hot air such as direct sunlight, illumination or heated air from a heating device such as a room heater or air conditioner. Doing so may cause warping, cracks or discolouration. To dispose of the packaging material after unpacking the product, follow the rules implemented by your local government.

Parts

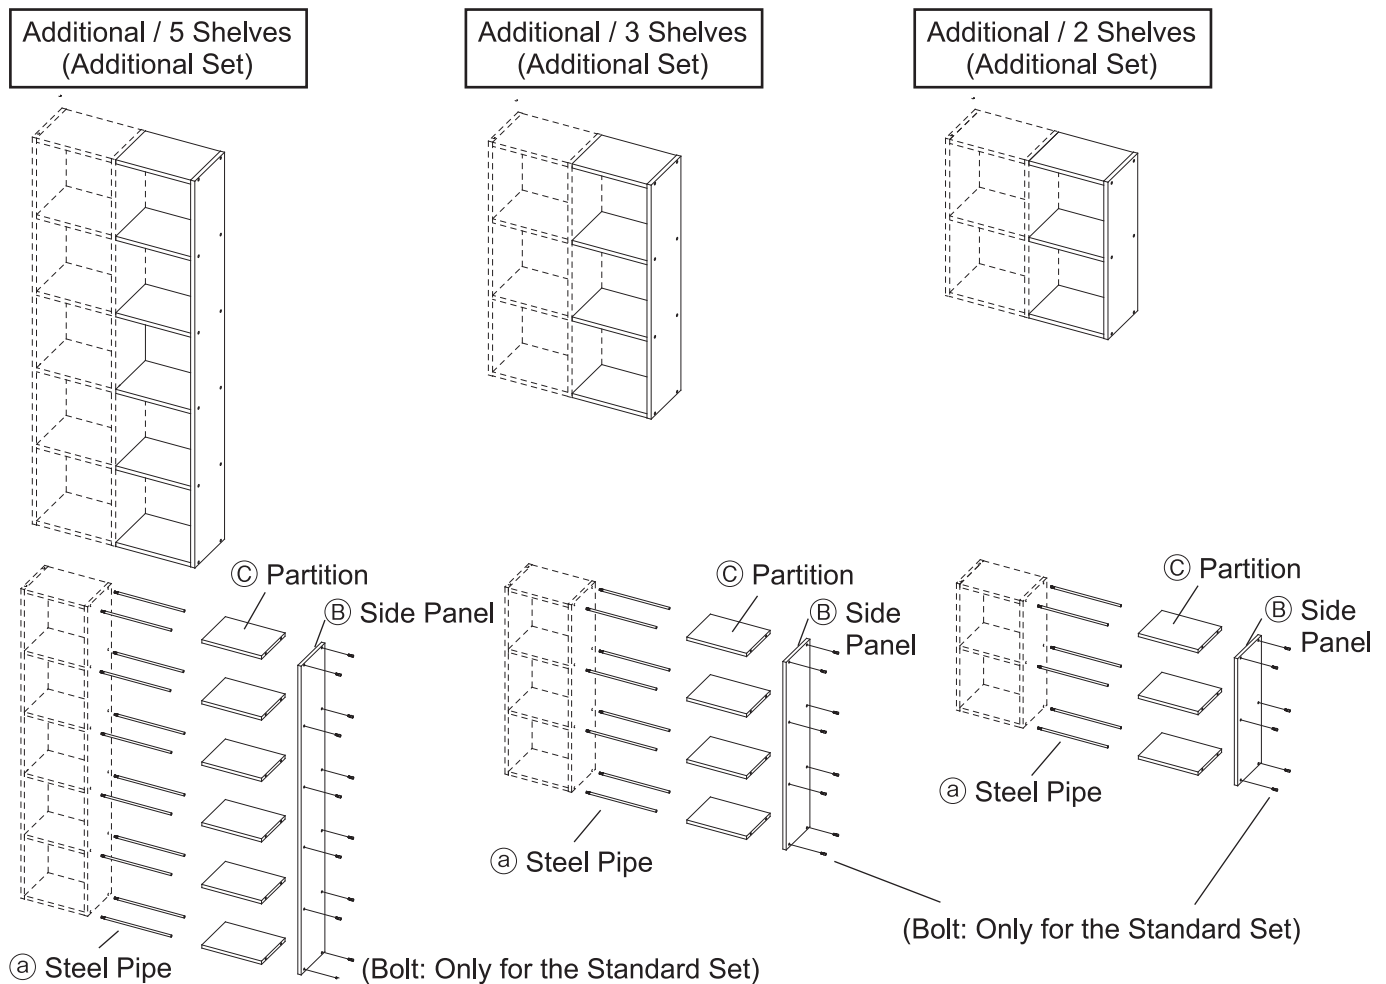

Set Type Part Name	Additional / 5 Shelves (Additional Set)	Additional / 3 Shelves (Additional Set)	Additional / 2 Shelves (Additional Set)
Ⓐ Side Panel (Non-through hole type)	Not included in the Additional Set. (Only for the Standard Set)		
Ⓑ Side Panel (Through hole type)	* Holes pass through  × 1	* Holes pass through  × 1	* Holes pass through  × 1
Ⓒ Partition	 × 6	 × 4	 × 3

Parts (Cont'd)

Fitting Parts			
Set Type Part Name	Additional / 5 Shelves (Additional Set)	Additional / 3 Shelves (Additional Set)	Additional / 2 Shelves (Additional Set)
(a) Steel Pipe	 × 12	 × 8	 × 6
(b) Bolt	Not included in the Additional Set. (Only for the Standard Set)		
(c) Felt	 × 2	 × 2	 × 2
(d) Hexagonal Wrench (4mm)	 × 1	 × 1	 × 1
(e) Sliced Veneer Sticker	 × 12	 × 8	 × 6

Part Names

* Parts indicated with the dot-dash line are parts for the Standard Set.
They are not included in the Additional Set.

Assembly Instructions

- * Please note the assembly methods for 5 Shelves , 3 Shelves and 2 Shelves models are the same but the quantity of parts is different.
- * The assembly instructions in step **1** below describe how to attach the Additional Set to already assembled Standard Set. To connect the additional set after assembling the Standard Set, assemble from step **2** onwards.

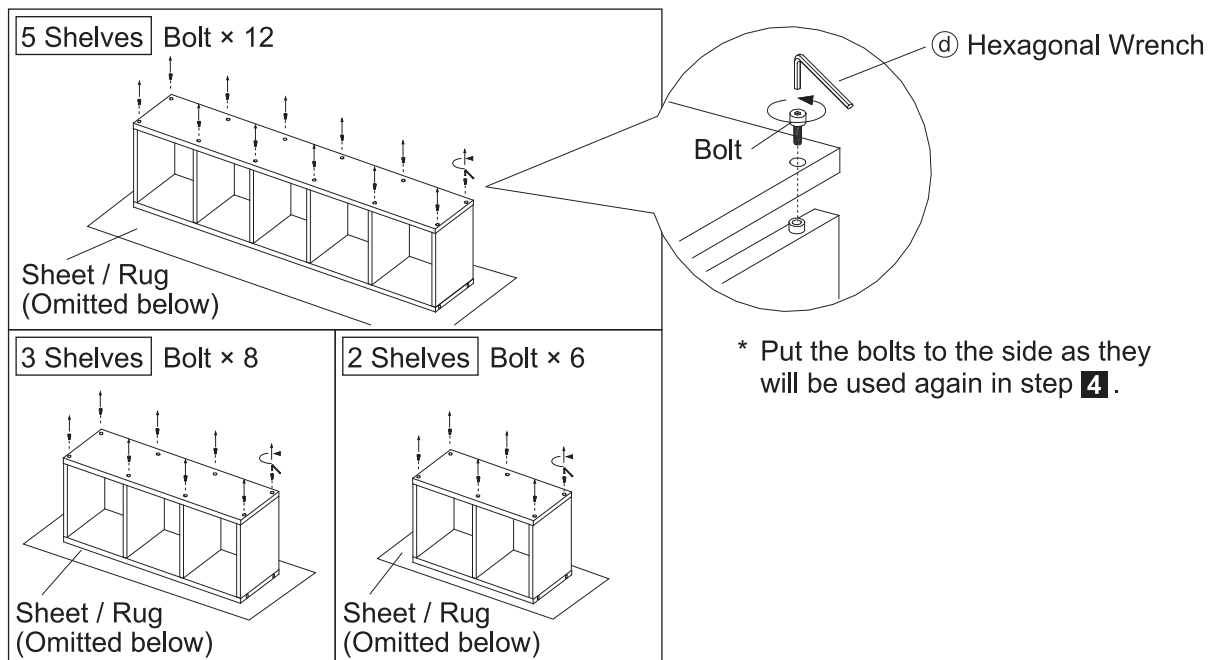

Caution

- The product must be assembled by two or more people. It is difficult to assemble alone as some parts cannot be held by just one person, resulting in a damage or an injury causing by the parts falling.
- Do not use power tools to assemble the product. Use the provided hexagonal wrench. Using power tools may cause parts to be over-tightened, resulting in damage to the product.
- Re-tighten all bolts approximately one week after assembly.
Bolts may become loose at the start of use, and continued use with loose bolts may result in damage or injury.

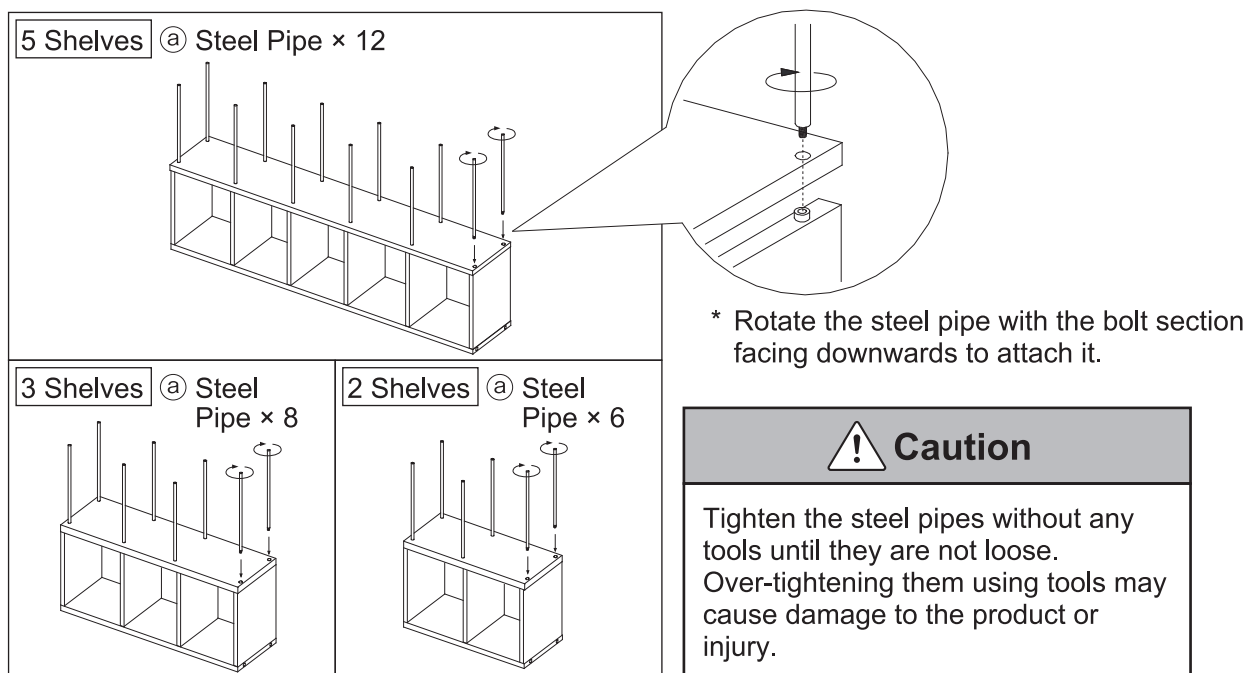

1

Place the Standard Set on a sheet / rug with the side on which the bolts can be seen facing upwards. Use the ④ hexagonal wrench to remove the bolts.

2

Attach the ③ steel pipes in the holes on ② side panel (through-hole type).

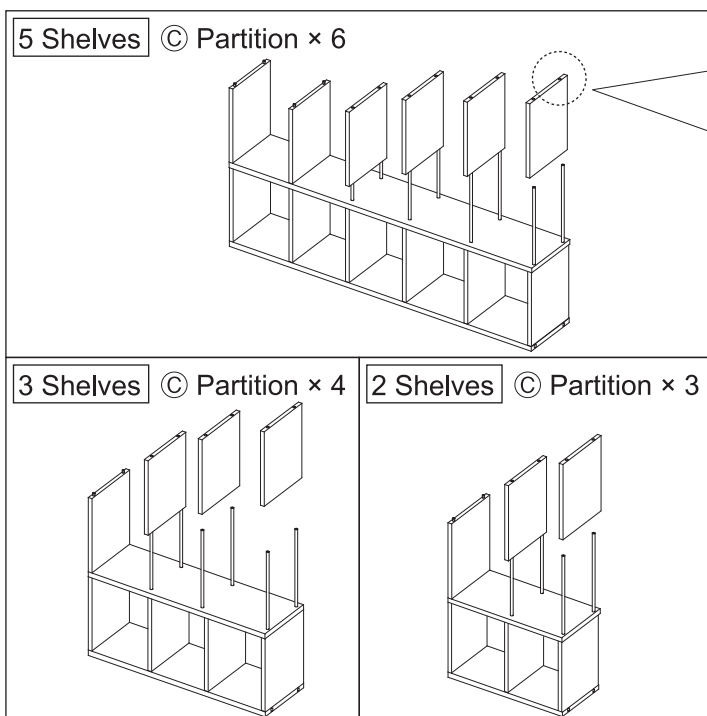

Caution

Tighten the steel pipes without any tools until they are not loose. Over-tightening them using tools may cause damage to the product or injury.

Assembly Instructions (Cont'd)

3

Put the ③ partitions onto the attached steel pipes.

Note (Other Cautions)

Use the ④ hexagonal wrench to feel for the steel pipes while passing it through.

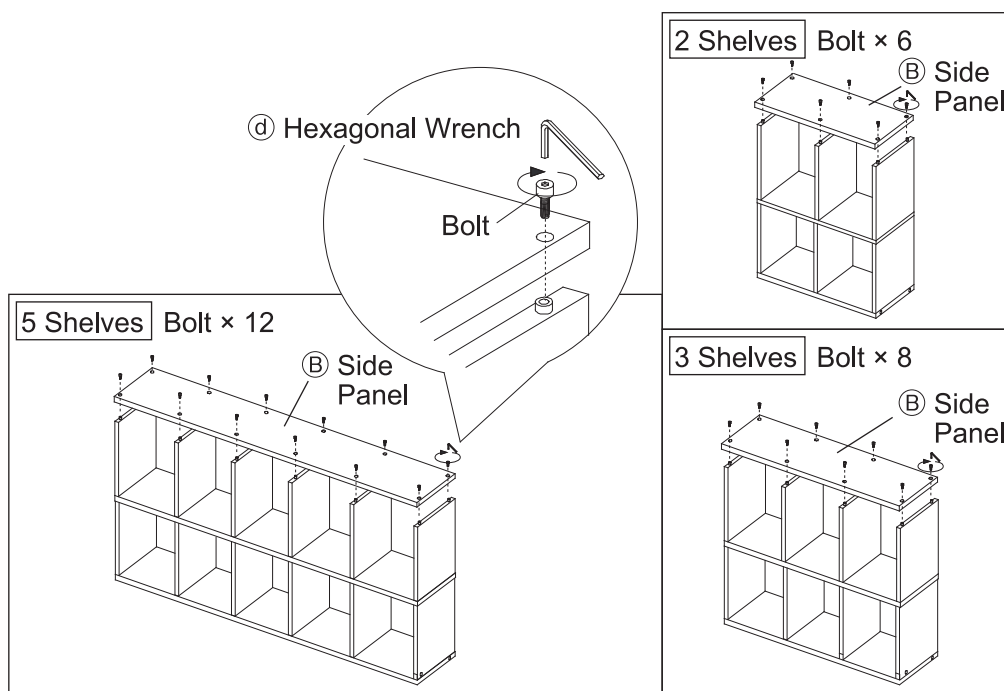

Trying to force the pipes through will cause damage to the product.

* Some wood chippings may fall out when passing the steel pipes through, but this does not affect the use of the product.

4

- ① Align the holes on ⑤ side panel (through-hole type) with the positions of the steel pipes to attach.
- ② Attach all of the bolts removed in step **1** to the holes, then use ④ hexagonal wrench to tighten them.

To connect another additional set, return to step **2** without attaching the bolts in step **4** ②, repeat steps **2** to **4** ① and then perform step **4** ② at the end.

Assembly Instructions (Cont'd)

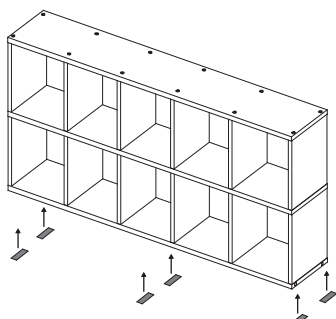

5

Attach the © felt to the bottom side as shown in the illustrations.

When Installed Horizontally

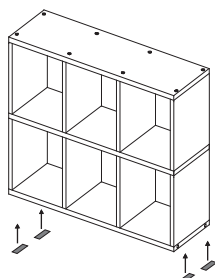

* Illustrations show Standard Set + Additional Set

5 Shelves

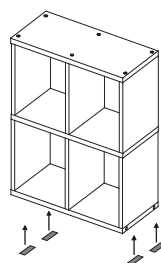

© Felt × 6

3 Shelves

© Felt × 4

2 Shelves

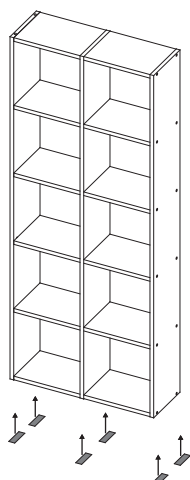

© Felt × 4

When Installed Vertically

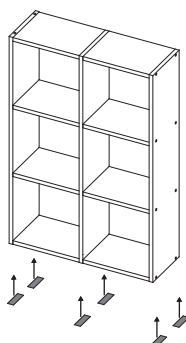

* Illustration shows Standard Set + Additional Set

5 Shelves

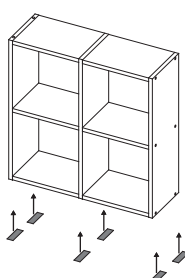

© Felt × 6

3 Shelves

© Felt × 6

2 Shelves

© Felt × 6

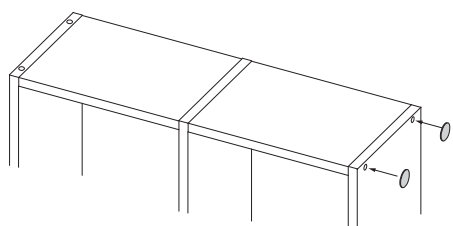

Caution

- © Felts are used to protect the floor.
- Remove any foreign matter such as dust from the attachment surface before attaching the felt. Foreign matter reduces the adhesive strength of the felt.
- Press the whole felt sticker hard with your fingers to ensure even adhesion.

6

Attach © sliced veneer stickers to the parts where bolts are visible.

If preferred, attach the stickers to the places where metal can be seen on the surface of the product with the grain of the sticker aligned with the wood grain.

© Sliced Veneer Sticker

**Note
(Other
Cautions)**

- Attach the © sliced veneer stickers one week after procedure **5**, when re-tightening all of the bolts. Sliced veneer may be peeled off from the surface of the product when removing the sliced veneer stickers.
- There may be differences in the grain and colour of sliced veneer stickers because natural wood is used.

Complete

Attaching the Anti-tip Fittings

- When using the product with 3 shelves high or more, always attach the anti-tip fittings provided with the Standard Set and Open Type / Additional Set.
- These auxiliary parts are important for preventing the product from rocking or deforming during general use when putting in and taking out items.
(Please note these are not earthquake-resistant fittings.)

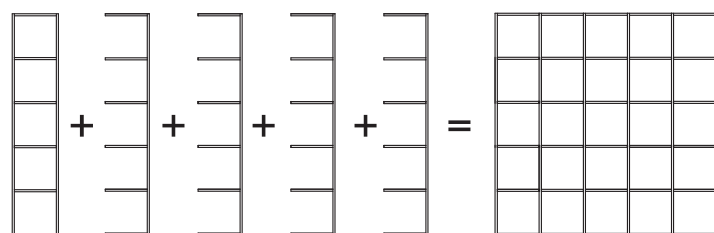

* For details on how to attach the fittings, see the pages on installing the anti-tip fittings in the User Guide provided with the Standard Set.

Directions for Use

Stacking Shelves can be connected horizontally or vertically to suit how you want to use them. Please refer to the usage examples and withstand load calculations below to enjoy your original storage products (illustrations are of example uses).

* Needs to be used in combination with a Standard Set (sold separately).

Horizontally Combining Vertically Standing Units

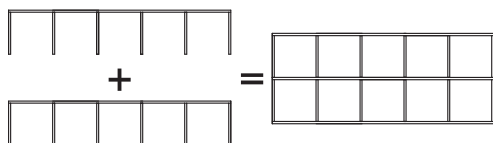

5 Shelves (Standard Set) × 1
+ Additional / 5 Shelves × 4
Withstand load: Overall approx. 150kg
(approx. 60kg × 5 shelves ÷ 2)

Calculating Withstand Load

Overall withstand load when using in combination
= Withstand load of shelves × quantity ÷ 2

Vertically Combining Horizontally Standing units

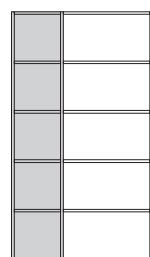

5 Shelves (Standard Set) × 1
+ Additional / 5 Shelves × 1
Withstand load: Overall approx. 60kg
(approx. 60kg × 2 shelves ÷ 2)

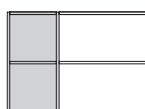

Calculating Withstand Load

Overall withstand load when using in combination
= Withstand load of shelves × quantity ÷ 2

Combining Items of Different Widths

This method is used to horizontally connect items that have different widths.

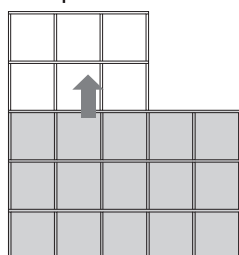

Caution

When combining items of a different width such as Stacking Shelf / Wide and Open Type / Additional Set, the main unit cannot be used horizontally.

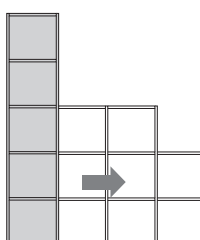

Combining Different Numbers of Shelves

This is the method for vertically combining horizontally standing units.

* Up to 5 shelves can be stacked up.

This method is used to horizontally connect vertically standing units.

An Additional Set that is larger (more compartments) than the Standard set cannot be connected to the Standard set.
Doing so may weaken the strength of the product, causing damage or injury.

Directions for Use (Cont'd)

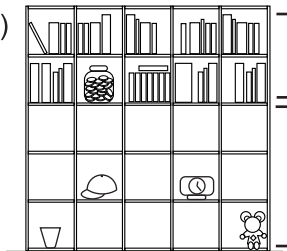

Precautions for Storage

- Do not place items on only one side of the top shelf. Doing so may cause the product to become unbalanced and unstable, resulting in injury from losing balance and falling.
- Do not place heavy items on the top shelf. Items may fall or the entire product may tip over in the event of an earthquake, etc., resulting in injury.

Unstable Usage

(Example)

Heavy Items

Light Items

* The illustration shows the Regular type / 5 Shelves (Standard Set) + four Additional / 5 Shelves

Moving the Product

- Moving For a Short Distance when Fully Assembled
 - ① Remove all stored items before moving the product. The product must be moved by at least two people, by holding the left and right side panels firmly.
 - ② Do not push or drag the product on the floor. Doing so may cause scratches or damage to the floor.
- Moving the product for a move, etc.

When moving the unit for a move, disassemble the unit before moving it.
Failure to do so may result in the parts becoming deformed or bolts becoming loose, which may cause damage to the product or injury.

Disposal

- To dispose of this product, follow the rules implemented by your local government.

Care Instructions

Maintenance and Inspection

Inspect the following points periodically.

- Do not use this product if it is damaged or deformed.
- Inspect the steel pipes, bolts and anti-tip fittings for looseness or wobbling.

If you find any parts that are loose or wobbling, immediately use a tool to re-tighten the loose parts.
- Stop using this product immediately if you find any damaged parts.

Continued use of the product in this state may cause damage to stored items or injury due to deformation or the product tipping over.
- Take insecticidal measures immediately if any type of pest is found. If left untreated, insect damage may worsen.

Dirt and Stains

Maintenance for Wooden Sections

- Gently wipe off dust from coated surfaces using a soft cloth or duster. Rubbing dusty surfaces with a hard cloth is counter-productive as it may cause small scratches to occur. Generally, wiping off with soft, dry cloth is sufficient for cleaning.
- If the product is particularly dirty, wipe off the dirt using a cloth soaked in watered-down neutral detergent solution, and then wipe off any detergent residue with a damp cloth. Next, gently wipe with a soft, dry cloth and let the product dry naturally.
- Do not leave a chemical duster in contact with the product for a long time, as doing so may cause discolouration or peeling of the surface coating.

Care Instructions (Cont'd)

Maintenance for Metal Sections

- For general care, wipe with a soft, dry cloth.
- When they are heavily stained, remove the stain with a cloth soaked into neutral detergent diluted to 3 to 5%. Then, wipe off the residual detergent with a cloth soaked into water. Next, gently wipe with a dry cloth, and let the product dry naturally.

Usage

Cautions for Natural Wood Products

- This product is manufactured using natural wood (sliced veneer). There are differences in the grain and colouring as a result of these natural materials.
Please note in advance that the wooden grains and colours of the all products are not the same.
- Please note that cracks and warping may occur in natural wood (sliced veneer) in the following conditions.
 - ① Avoid use in a place that is subject to direct sunlight wherever possible.
If use in direct sunlight is unavoidable, reduce the amount of sunlight wherever possible using curtains, etc.
 - ② Avoid use near heaters or air conditioners wherever possible. Be sure that the air from heaters or air conditioners does not come into direct contact with the product.
 - ③ In particular, the dry air in the room during winter due to a heater can easily cause cracks and warping in natural wood.

Formaldehyde Countermeasures

- What is Formaldehyde?
Formaldehyde is said to be one of the causes of sick house syndrome. It is a colourless, pungent smelling compound that vaporizes at room temperature, and is found in such items as furniture, building materials and wallpaper adhesives. It is released gradually, but people in a room where formaldehyde has accumulated for a long time may experience symptoms such as itchy eyes or a sore throat. A high concentration of formaldehyde may cause breathing difficulties.
- Ventilate the room.

Ventilate the room well when installing the furniture. Small children and those who are sensitive to chemicals may have an allergic reaction.

Formaldehyde is easily dispersed in the air. Therefore, be sure to ventilate the room regularly. In particular, be sure to open the window as wide as possible and thoroughly ventilate the room when assembling a number of furniture items at the same time. More formaldehyde is released when the room humidity increases. Therefore, be careful if the room is closed for a long time during the summer, and ventilate the room thoroughly. In order to increase ventilation efficiency, it is recommended that you open multiple windows, or use a ventilation fan or air circulator.

- For Persons Who Have High Sensitivity to Chemicals
There are individual differences in resistance to chemicals other than formaldehyde that are related to sick house syndrome. Therefore, even when the actual formaldehyde value in the room is lower than the indoor concentration guideline value (indoor concentration of formaldehyde that is desirable for health), some people react to formaldehyde. At present, MUJI furniture products are made with materials that emit as little formaldehyde as possible, but this does not guarantee that no formaldehyde is emitted at all. In the event that an allergic reaction occurs, seek medical treatment.
- MUJI furniture products contain formaldehyde absorption / decomposition sheets(*) as part of the packing materials.

(* Formaldehyde absorption / decomposition sheet: Jointly developed with Aisin Seiki Co., Ltd.)

When used in narrow spaces, formaldehyde may be re-absorbed by the material if there is nowhere for it to dissipate. Formaldehyde absorption / decomposition sheets are used to reduce the concentration of formaldehyde as much as possible before the product reaches the customer.

* Effectiveness of the "formaldehyde absorption / decomposition sheet" in the packaging has been expended by the time the package reaches the customer, and it can be disposed of as burnable waste.
