※ The characteristics of natural wood, such as the colour and grain, may vary in appearance depending on the material.
 ※ To ensure the long term use of your bed frame, please use a bed mattress that provides superior body weight distribution. Do not use a futon directly on the bed frame as doing so can cause damage to the frame or cracks in the boards.
 ※ Can be combined with a high density pocketcoil, pocketcoil, spring or other coil mattress.
 ※ Bed Frame must be used with a mattress with a height of at least 19 cm.

Storage Bed

This single bed features a storage space equal to that of two wide 4-drawer chests. Store everything from daily-use clothing to suitcases and comforters.

※ Combination example: Mattress and headboard are sold separately.

Example storage

Example storage under a Double bed

A storage space is also provided behind the drawer space. In the space under Double size, you can store long or large objects, such as rugs, skis, duvets, and carry cases.
※ Bottom board is not provided under the open space.

Ventilation holes
Base support
Ventilation holes are made below the open space to allow moisture to escape.

Drawers
In the drawers, available for all sizes of beds, you can store daily-use clothing and beddings.

Mattress With Legs (Washable Cover)

This simple bed was born from a meticulous pursuit of sleeping comfort and quality materials. Can be used both as a bed and as a sofa. The frame for the mattress with legs has been changed to a steel mesh frame to ensure sleeping comfort with moderate softness.

Changeable cover (Outer shell) and Coil unit

The legs, steel frame, and coil unit can be separated. A bed can be covered with a fabric cover with removable tape. The spare parts are available so that old parts can be replaced, which can also reduce the burden on the environment by separating the waste upon disposal.

※Parts for steel frames are not sold.

Rotate the mattress for longer life

Switch the head and feet side every season. The strength of springs may deteriorate if a load is continuously applied to the same point. By changing the mattress orientation and distributing your body weight more evenly over time, you can reduce the load on the springs. Make sure to periodically air the mattress by standing it up. Moisture may build up inside the mattress if it is always kept on the bed frame, possibly leading to the formation of mould.

Well-balanced placement of pocket coil springs

Slightly firmer springs are used in the lower-back area for extra durability. Even firmer springs are used around the edges to support body weight when sitting. Softer springs are used in the wide area that supports the body. The springs with three different levels of firmness are placed appropriately for each function.

Underbed storage for mattress with legs

* Storage boxes cannot be inserted if 12 cm-type legs are used.

Mattress

You can choose from three kinds of coil mattresses that maximise the sleeping comfort provided by the coil springs by using the minimum required amount of filling material, such as urethane foam.

High Density Pocketcoil Mattress

82259001 | Single \$799.00
82259025 | Double \$1199.00
82259032 | Queen \$1499.00
82259049 | King \$1799.00

The increased number of coils enables the mattress to more evenly distribute your body weight, reducing the pressure on your spine and lower back. The coils work together to conform to the shape of your body, providing a well-balanced and stable posture for longer periods of time.

Pocketcoil Mattress

18094844 | Single \$499.00
18094868 | Double \$799.00
61863351 | Queen \$999.00
61854182 | King \$1199.00

This mattress is constructed with a dense arrangement of independent coils that function as numerous dots to hold your body weight and provide well-balanced support. The mattress ensures a stable posture and reduces the amount of wobble and sinking.

Bonnell Mattress

15901838 | Single \$239.00
15901852 | Double \$399.00

This mattress features an interlocking design of hourglass-shaped springs that firmly support your body weight across the entire surface. The mattress uses Bonnell coil springs, which are currently the most prevalent and reliable type of mattress-coil use.

 This mattress uses urethane, suitable for use as a floor mattress and can be directly placed under a futon.
 ※Please note that urethane foam will tend to discolour but does not affect product performance.

Natural grey colour

Many grey geese are found in quiet rural areas of Ukraine. Though domesticated long ago, the grey goose retains the dark colour reminiscent of wild migratory geese.

The birds roam freely in a natural environment. When fully grown, the grey goose is bigger than a duck and has excellent mobility. The warm and strong feathers of the grey goose are ideal for duvets.

The geese on the farm are fed corn in the morning and after that, they eat naturally growing grass and insects.

Families of geese congregate on nearby lakes and rivers in early spring.

The geese return to the farm in the evening.

Bed Pad

This Bed Pad is washable using a net, so it can be kept clean. It comes with elastic tapes, which makes it hard to shift.

A bench in the shape of a traditional bench that has been in use in China since old times, is compact and applicable to multiple purposes.

※ We recommend using placemats and coasters when dining.
 ※ Due to the use of natural wood, the colour of each product may vary slightly. The colour may also appear different under different lighting.
 ※ Due to the nature of the material, oak may have a unique pattern called "tiger grain."
 ※ The characteristics of natural wood, such as the colour and grain pattern, may vary in appearance depending on the material.

Oak
 Used for furniture and whiskey barrels for many years, oak which is hard, solid, and durable is a perfect material for long-lasting furniture. The delicate and soft expression creates furniture with a mellow impression. Patterns called "tiger grain" which resemble the pattern of a tiger and its delicate and gentle grain are characteristics of oak. The look of oak is enhanced as the material ages over time.

Walnut ※ Only for Special Order
 Walnut is a well-known wood that has been used for furniture since olden times and is still used today for high-end furniture and crafts. It features a beautiful surface and little warping. Ageing of the wood can be enjoyed as the wood contains a moderate amount of oil which provides glossiness and allows the wood to age well. Walnut is treasured as one of the world's three major woods together with teak and mahogany.

Oakwood / Round Leg Series

Burlwood with diverse colours is selected and used as it is. Even though the pattern is irregular, MUJI tables are processed by highly skilled Japanese craftsmen using high-quality materials.

Natural Oak Table / Round Leg / W 220 cm

Pursuing furniture that can be used for a long time

It is characterized by its basic design that can be used for a long time. Oakwood takes almost 100 years to grow to be used as a furniture material. Therefore, we process the material without producing waste. We focus not only on the material used but also on the shape of the table and chair. When more people join, the oval shape allows them to sit anywhere. The chair's shape is designed for the easiness to sit and stand, and change posture.
