### Frame

A part that supports the shelf boards. You can make your own original shelf by connecting them horizontally and by choosing the height.

#### Additional Stainless Frame

61179223	Large	\$109.00
3 61179230	Medium	\$89.00
61179247	Small	\$59.00
61179254	Mini	\$49.00

The storage goods on P74 - 89 with this symbol fit nicely on the Unit Shelf.

\*1 The shelf boards are made of steel, and the hooks are made of stainless steel to allow them to be combined with the frames of Stainless Steel Unit Shelves.

**Height Adjustment Bracket**

**76580850** Set of 4 **\$19.00**

- \* Up to three sets of Height Adjustment Brackets (enough for three shelf boards) can be used for each set of shelves.
- \* Shelves with Height Adjustment Brackets attached can be raised up approximately 9.5 cm higher.
- \* Make sure to use this item together with shelves without any bracket.
- \* This item cannot be attached to an Additional Shelf / Wire Type, Additional Shelf / Corner Type or Additional Shelf / Narrow Type.

**Shelf Board / Corner Type**

With this L-shaped shelf board, the space can be used more effectively. By changing the position of the metal fittings, you can change the direction of the connection.

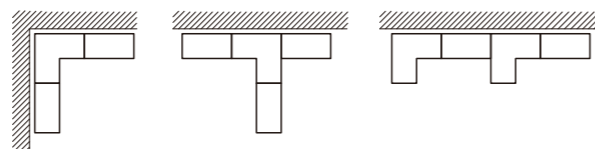

**Additional Shelf / Corner Type (For W 84 cm)**

1 **37413887** Oak **\$149.00**  
**37413894** Walnut **\$159.00**

- \* If you use an Additional Shelf / Corner Type without attaching it to another shelf, Reinforcement Parts (\* 1) and Cross Bars (\* 2) are necessary to strengthen the unit. Depending on the combination, the number or type of pieces required may vary.

[Withstand Load]	[Effective Inside Dimensions]
Shelf board: approx. 30 kg * When load is distributed evenly across the entire unit	

**Corner Type Combination Patterns**

You can combine the shelves to match your room's layout.  
 \* Please see P39 for the number of shelf boards required.

**Wardrobe Bar**

A part that turns your Unit Shelf into a wardrobe.

**Steel Unit Shelf / Wardrobe Bar**

**Side Inner Panel / L / 3 Compartment Type**

**37414686** Light grey  
**37414693** Dark grey **Each \$36.00**

This panel is to attach to the inside of the Unit Shelf.

- \* The Side Panels and Side Inner Panels are specifically for D 41 cm type. It cannot be used with D 25 cm type.

**Casters**

Casters to make the shelf movable.

**Caster / Grey**

1 **61179780** Set of 4 **\$19.00**

- \* Do not use the casters with L-sized frames.
- \* Changing the adjusters to casters increases the total height by 5.1 cm.
- \* When using casters, consider the withstand load to be half of the withstand load of when used without casters.

**Auxiliary Parts**

Attach the Reinforcement Part instead of the bottom shelf, and use the space for large items such as a washing machine or refrigerator.

**Reinforcement Part For Frame / D 41 cm Type**

2 **76580874** For W 84 cm type **\$43.00**

Inside dimensions: W 78 x D 36 cm

----------	----------	---------

\* Up to three sets of Height Adjustment Brackets (enough for three shelf boards) can be used for each set of shelves.  
\* Shelves with Height Adjustment Brackets attached can be raised up approximately 9.5 cm higher.  
\* Make sure to use this item together with shelves without any bracket.

## Reference Table for Required Number of Unit Shelf Parts

To ensure a certain level of stability for Unit Shelves, a specified number of parts are required for assembly. Refer to the table below for the minimum number of parts required for your particular configuration.

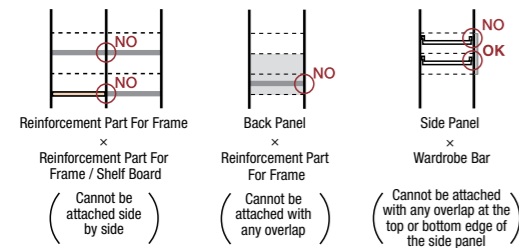

Frame size		 Large	 Medium	 Small	 Mini
W 84 cm	Shelf Boards or Reinforcement Parts For	3	3	2	3
	Cross Bar / Large	2	1	1	0
W 56 cm	Shelf Boards or Reinforcement Parts For	3	3	2	3
	Cross Bar / Small	2	1	1	0
W 42 cm	Shelf Board	3	3	2	3
	Cross Bar / Small	2	1	1	0

\* The stability may also vary depending on the location of the assembled parts. The stability of the unit may decrease if the shelf boards are not evenly spaced, even if more than the required number of parts are used. In particular, if you do not use a shelf board at the top or bottom of the unit, or if you leave an excess space between the shelves, it may cause the unit to be unstable. Make sure to install the shelf boards evenly spaced.

\* Side Panels, and the Additional Shelf / Narrow Type are not designed to function effectively as reinforcement part for frame.  
\* The required number of parts may vary depending on the configuration when Cross Bars are used to replace the Back Panel.

### Notes on using Unit Shelf Parts

Unit Shelves cannot be assembled in the configurations shown in the illustrations below.

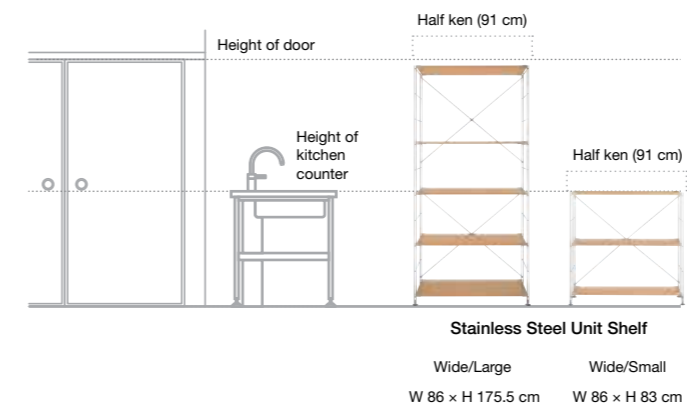

\*1 This item cannot be attached to an Additional Stainless Steel Shelf / Wire Type or Additional Shelf / Narrow Type.

## Our Approach to Standard Dimensions of Modules

The standard dimensions of modules are based on "shaku", which is a unit of measurement used in the construction of Japanese homes. These dimensions are used in a wide variety of items ranging from large furniture to small storage items. For example, the height of a unit shelf is based on the height of a "kamoi" (lintel) or door, and shelf width is based on the width of a half "ken" (91 cm), so that they can fit neatly within the width of 1 "ken" (182 cm), between two columns.

### Unit shelf module dimensions "175 cm and 86 cm"

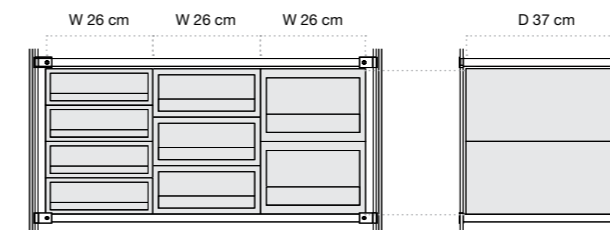

The 175 cm height corresponds the height of doors in Japanese homes. The 86 cm width is based on the "ken" (182 cm), which is a unit of measurement used in the construction of Japanese homes. "Outer width 86 cm, inner width 84 cm" which is slightly less than a half "ken" (91 cm), is a standard dimension for MUJI products.

### Storage item module dimensions "37 cm and 26 cm"

Storage item modules are sized to fit neatly in storage furniture with dimensions of 175 cm and 86 cm. The module dimensions of 26 cm and 37 cm, which are designed to fit on shelves, are based on the inside dimensions of shelves (W 80 × H 35 cm). See P82 for more details.

## Extending shelves vertically or horizontally

By combining a basic set with additional sets, you can extend the shelves vertically and horizontally to achieve your desired configuration. MUJI's storage items fit nicely in these shelves.

\* The characteristics of natural wood, such as the colour and grain pattern, may vary in appearance depending on the material.  
 \* Assembly needs to be performed in an area with enough space to lay the shelf unit on its side. \* Withstand loads are calculated based on evenly distributed weight.

\* Usage example

**Stacking Shelf / Open Type Additional Set**

The Stacking Chests are sized to fit perfectly in the spaces of the Stacking Shelf.  
(Anti-slip pads are included.)

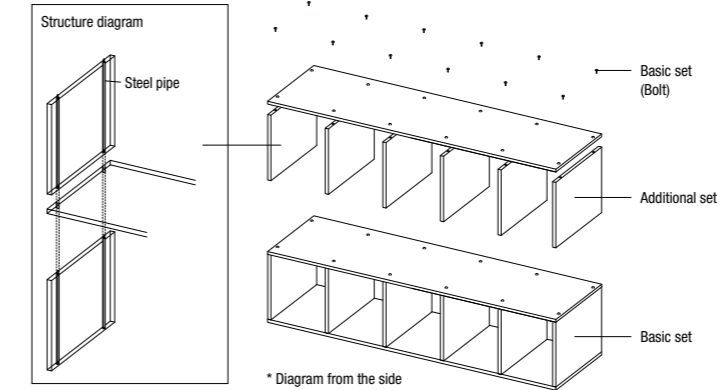

When stacking chests vertically, attach the Metal Joint Fittings For Pulp Board Boxes 18960941 (set of 2) (P61) to the back of the chests.

\* The characteristics of natural wood, such as the colour and grain pattern, may vary in appearance depending on the material.  
\* Withstand loads are calculated based on evenly distributed weight.  
\* The material used inside the drawers (MDF) may have a distinct smell. Although the smell will fade with use, it is recommended to avoid storing clothing or other items that can absorb odour inside the drawers.

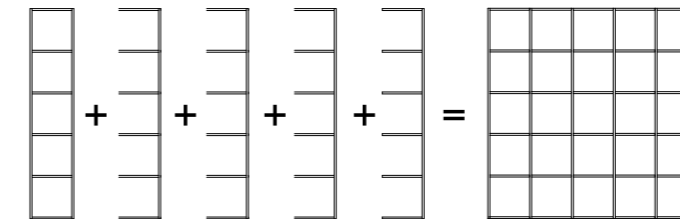

**Structure of the Stacking Shelves**

Original storage furniture can be freely created by combining a basic set with additional sets. As shown below, the units can be easily linked by connecting the steel pipes within the dividers and fasten them with bolts.

**Stacking mechanism**

**Example of combination and withstand load**

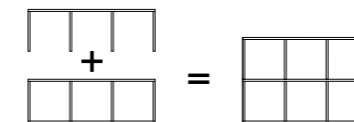

Basic Set / 5 Shelves × 1 + Additional Set / 5 Shelves × 4

A combination method consisting of a shelf in the upright direction and additional units linked to the side.

Withstand load: 150 kg total = 60 kg × 5 units ÷ 2

$$\text{Total withstand load when shelves are combined} = \text{Withstand load of set} \times \text{number of units} \div 2$$

Basic Set / 3 Shelves × 1 + Additional Set / 3 Shelves × 1

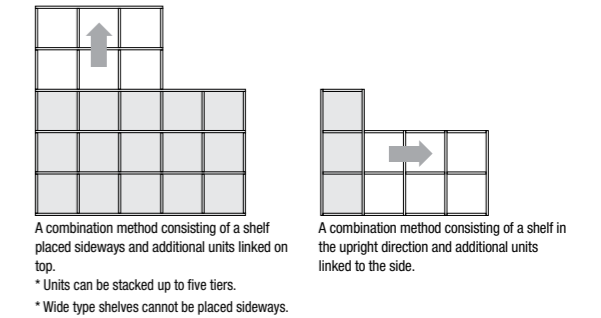

A combination method consisting of a shelf placed sideways and additional units linked on top.

Withstand load: 40 kg total = 40 kg × 2 units ÷ 2

$$\text{Total withstand load when shelves are combined} = \text{Withstand load of set} \times \text{number of units} \div 2$$

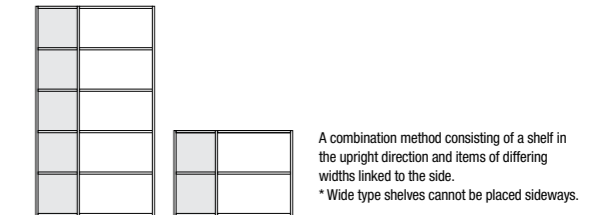

**Example of Usage**

**Combination of differing tiers**

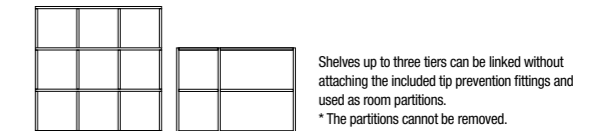

A combination method consisting of a shelf placed sideways and additional units linked on top.  
\* Units can be stacked up to five tiers.  
\* Wide type shelves cannot be placed sideways.

**Combination of items with differing widths**

A combination method consisting of a shelf in the upright direction and items of differing widths linked to the side.  
\* Wide type shelves cannot be placed sideways.

**Using as a partition**

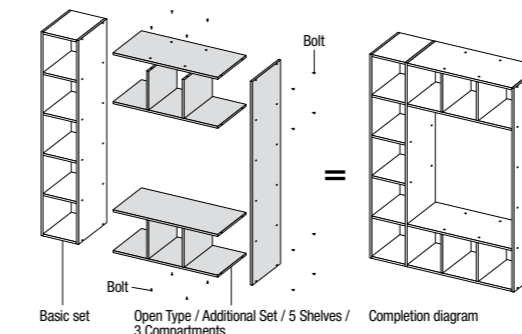

Shelves up to three tiers can be linked without attaching the included tip prevention fittings and used as room partitions.  
\* The partitions cannot be removed.

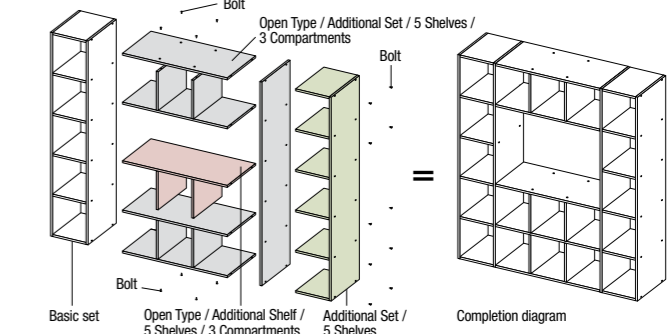

**Structure of the Stacking Shelf / Open Type**

Storage furniture can be freely created by using steel pipes to combine the basic set with open type components. The two following patterns are basic combinations. (Common to 2 Compartment and 3 Compartment models.)

**Combination pattern 1**

**Combination pattern 2**

# Stacking Cabinet

Cabinets that make it possible to create original storage by combining a standard set with additional components.

Whether it is to make an AV rack, a bookshelf, or storage furniture for the living room or bedroom, storage units to suit each need can be created simply by combining components of your choice.

## Combining various parts to create a storage unit that suits your specific needs

By combining a standard set with additional sets and optional parts, you can create a cabinet such as a wall storage unit, AV rack, chest, or cupboard that is easy to use and well-suited to your space.

**Stacking Cabinet / Standard Set / 162.5 cm**  
 1 **38918073** Oak **\$479.00**  
 W 162.5 x D 39.5 x H 45 cm  
 Withstand load: 65 kg for top board, 5 kg per compartment (for both 78 cm-wide and 37.5 cm-wide)

**Stacking Cabinet / Additional Set / 162.5 cm**  
**38917908** Oak **\$429.00**  
 W 162.5 x D 39.5 x H 40 cm  
 Inside dimensions of each compartment (with shelf board in centre, no doors): W 78 x D 38 x H 17.5 cm

**Stacking Cabinet / Standard Set / 82.5 cm**  
**38918080** Oak **\$289.00**  
 W 82.5 x D 39.5 x H 45 cm  
 Withstand load: 40 kg for top board, 5 kg per compartment

**Stacking Cabinet / Additional Set / 82.5 cm**  
**38917915** Oak **\$249.00**  
 W 82.5 x D 39.5 x H 40 cm  
 Inside dimensions of each compartment (with shelf board in centre, no doors): W 78 x D 38 x H 17.5 cm

- \* The shelf can be adjusted to three heights in 6 cm intervals.
- \* The rear panel has a wiring hole and a space at the rear of the shelf to enable access when wiring an electric equipment from both the top and bottom of the cabinet.
- \* The effective inside dimension of the hole for cables is 2.5 cm.

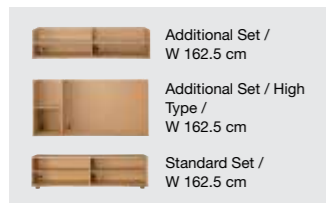

**Stacking Cabinet High Add On**  
 2 **38917939** Oak **\$569.00**  
 W 162.5 x D 39.5 x H 79.5 cm  
 Tolerable weight: Top board 30kg  
 The high type (additional set) can only be installed on the second stack and 1 stack of the additional set can be added onto it (width 162.5cm type only)

\* The characteristics of natural wood, such as the colour and grain pattern, may vary in appearance depending on the material.  
 \* Withstand loads are calculated based on evenly distributed weight.  
 \* Assembly needs to be performed in an area with enough space to lay the cabinet unit on its side. Take note of this especially when combining the high-type cabinet.

## Structure of the Stacking Cabinets

Units can be stacked to form a cabinet of your preference while optional parts can be combined for added convenience.

Additional sets can be stacked on the Standard set.  
\* Attach the additional set by removing the top panel.

Optional parts are also available to meet different needs.

Completed combination.

\* Units can be stacked up to five tiers. The cabinet can be used with its legs removed.  
\* One of the rear panels can be removed from a combination of up to three tiers. Please be sure to place an adjustable shelf in the compartment from which the rear panel is removed. Note that glass / wooden doors cannot be attached to the compartment from which the rear panel has been removed. The rear panel cannot be removed in sections where the high-type cabinet is being used. (This arrangement can be useful when placing a large audio visual amplifier or any other equipment that will generate a great amount of heat.)

\* When combining a Stacking Cabinet Set / High Type / W 82.5 cm, the cabinet cannot be used with a height exceeding 165 cm.  
\* Attach a shelf board with two or more tiers or wooden door of high type when using the Stacking Cabinet / High Type / W 82.5 cm.  
\* The Stacking Cabinet / High Type / Additional Set / W 162.5 cm can only be installed on the second tier. One more additional set can be added on top.  
\* Refrain from placing a television wider than the top board on the cabinet.  
\* Drawers can be installed to a height up to 125 cm (i.e. height of six drawers).

# Oak Storage

Wooden storage units made from North American white oak and walnut. As the depth is the same for each model in the series, units can be combined to your preference.

## Example combination of Polypropylene Storage Box (approx. D 44.5 cm) series

## Translucent boxes with natural colour of the material

The trend for polypropylene products was to use colourful design schemes. However, MUJI developed uncoloured cases by eliminating the colouring process from the production process. Not only does the omission of the colouring process reduce costs, but it also allows you to see what's in the drawers while obscuring the contents with the cloudiness to maintain neat looks. Large cases are available in four series W 40 x D 65, W 44 x D 55, W 34 x D 44.5, and W 55 x D 44.5. Mix and match the items from a variety of dimensions according to the size of your storage space. The cases feature drawers, which prevents dust from accumulating. Casters can be attached for easy mobility.

### Country of origin of Rattan Basket

Rattan baskets sold by MUJI are made in Thai Binh province, northern Vietnam. Thai Binh province is a peaceful place with ricefields and free-range cows, buffalos, pigs, and chickens. In addition to farming, the area is also famous for its handicrafts, particularly items of woven rattan and bamboo.

### Making a rattan basket

The rattan, about 3-5 cm in diameter, must first be split into 5-9 mm strips before it can be used to make a basket. The rattan baskets are woven by hand, by farmers. Around 10,000 farmers live in Thai Binh province, it's a way to earn extra income to weave rattan during off-season. This rattan basket takes a long time to weave, only 1-2 can be made in a day.

\* Care instructions for natural material storage products: Do not use these products in humid places. Periodically dry the products in a shade, and remove dust from the surfaces using a vacuum cleaner or a duster.

## Bac Bac and Storage Units

The bac bac storage cases use carefully woven handmade ropes made from bac bac (Manila hemp) barks. Boxes made with bamboo's natural features are sturdy and stackable as it barely has size increments. It's easier to handle as they are now stackable.

\* Do not allow the resin material to come in contact with chemicals such as alcohol, oil, thinner, polish remover, strong acid, or strong alkali, as they may cause discolouration or deformation.  
 \* To prevent scratches when cleaning, avoid using cleansers, abrasive powder, or hard materials such as scouring pads.  
 \* Due to the characteristics of the material, stains or smudges may be visible on the surface.  
 \* To clean the resin material, gently wipe with a soft cloth soaked in a neutral detergent diluted with 50% water.  
 \* Do not use an acidic detergent for cleaning. Doing so may result in deformation.

## The items in this series are perfect for keeping your desk tidy.

These items can be stacked or used in combination with each other, enabling you to make more efficient use of the space on your desk. For smaller items, you can use trays that are divided into separate compartments, or you can attach legs to trays and use them as small shelves. These products are convenient when you do not have a lot to store, but want a place to put a few items.

Conveniently to store pens and various desk items.

Stack three trays for A4 size documents to keep your magazines, catalogues, and documents organised.

Trays with legs make efficient use of space and keep small, miscellaneous items organised.

### Storage Furniture & Storage Units

#### Quality in modest simplicity

Spaces inside Japanese homes are said to have developed around the dimensions of the standard tatami mat, which measures 180 cm by 90 cm. Tatami mats then determined the standard dimensions for the *fusuma* sliding doors that divide Japanese rooms. Even now with the Japanese homes rapidly westernising since the mid 1940s, these standard dimensions are still the norm today. It is this traditional concept that informs the designs behind MUJI storage furniture. Take the size of our Stainless Steel Unit Shelf / Wide / Large, for example, which is the standard for the series. The 175.5 cm by 86 cm shelves are approximately the same size as the standard tatami mat and *fusuma* door. This is a perfect storage unit for smaller rooms, while several units side-by-side create a unified, streamlined look in larger rooms. In addition to the 175.5 cm unit, we also offer 120 cm and 83 cm stainless steel shelves.

All models are available in both 86 cm and 58 cm width versions. At 41 cm deep, these shelves hold stacks of books. Our unit shelves hold storage boxes and baskets made from natural materials, as well as polypropylene, all designed to uniform dimensions to line up neatly for a clean, uncluttered look. Storage furniture should be adaptable and expandable for long years of use. MUJI storage units are designed so that customers can create and recreate the sizes and shapes that work best with their own particular space. Designed to make the most of the colour and natural qualities of the materials, creating a naturally beautiful backdrop to your days, MUJI storage holds its own no matter what the trends are. This is lasting quality born of modest simplicity.

“Storage built on the practical wisdom of tatami and *fusuma* design.”

## Sleep, wrapped in comfort.

Going to bed with the sun and waking at sunrise is conventional wisdom passed down through the ages. Our lifestyle has changed dramatically over time, but sleep is the one thing that has not changed. A proper night's sleep is still essential to staying physically and mentally healthy. How about coordinating your bed and the space around it with what makes you most comfortable and relaxed? MUJI offers a line of beds designed to create your ideal space, with an array of options to suit your space and style. Choose classic bedding items in subtle colours made from cotton, linen, and other natural materials that feel good against the skin. Change the fabric and colour of your bedding to suit the season for an even more comfortable night's sleep. You want to make this space the most comfortable in your home. MUJI's extensive line of beds, bedding, and bedroom accessories are designed to create your very own space for a perfect sleep.

**Storage Bed** ..... 76

Put an empty space to use with a bed with plenty of storage space below.

# Bed Frame

The low-profile frames create a subtle bed with a cosy feel. We carefully considered the layout and number of wooden springs, for a great sleeping comfort. Available in oak and walnut.

## Your original bed frame

People wish for uniquely different characteristics in beds, which is natural for equipment that people spend a lot of time on. More storage space, using two single-sizes side-by-side, (a rounded design so it does not hurt when you hit your toes), and a better ventilation, to name a few preferences. MUJI's Bed Frame was born from such customer feedback. The headboard is designed so that two beds can be seamlessly placed next to each other. The bed frame provides space underneath for storage. MUJI developed its new bed for the comfort of users during sleep and in daily life.

### Headboard

The angle of the headboard is adapted to give comfort and relaxation. One way of enjoying a bed is reading before bedtime while leaning against the headboard.

### Mattress

MUJI offers six types of mattresses with different sleeping comfort.

### Wood springs

The wood springs add a cushioning along with the mattress, dispersing the body pressure and reducing the load on the back and hips. This function of the wood springs also extends the life of the mattress. We carefully considered the layout and number of wooden springs, for a great sleeping comfort.

### Legs

The attached legs can be removed to use the bed placed directly on the floor.

### Storage

Adding Bed Frame / Canvas Basket (sold separately), you can most effectively utilise the space under the bed.

\* Example combination: mattress and baskets are sold separately.

- \* Floor to bed frame: 19 cm (when legs are attached / the same for all bed sizes)
- \* Height when placed directly on the floor: 6 cm (including felt).
- \* Please use the supplied felt when using the bed frame without the legs. Periodically stand up the mattress to air and remove humidity.
- \* Please use the mattress dedicated to a bed or Bed Frame / Cushion (Small only).

The legs can be removed to place the bed frame directly on the floor.

\* Example combination: mattress is sold separately.

### Wooden Bed Frame / Headboard / Oak

38371359	King (Nov)	W 182 × D 8 × H 53 cm	\$439.00

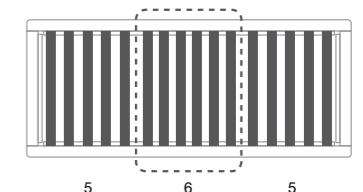

- \* The headboard is 2.5 cm thick. The height is approximately 80 cm when attached to the bed.
- \* The headboard cannot be used when the bed is used without legs.
- \* Due to the use of natural wood, the wood patterns differ with individual products.
- \* Due to the bent structure of the headboard, the angle of the headboard may vary. This can be adjusted by using a supplied spacer.

### A new look at the wooden springs

We carefully considered the layout and number of wooden springs, and increased the number of wood springs and cushioning for more comfort of lower-back.

\* Single, semi-double, double, queen, and king size.

\* The characteristics of natural wood, such as the colour and grain, may vary in appearance depending on the material.  
 \* To ensure the long term use of your bed frame, please use a bed mattress that provides superior body weight distribution. Do not use a futon directly on the bed frame as doing so can cause damage to the frame or cracks in the boards.  
 \* Various mattresses are listed on P112-114, including Ultra High Density Pocketcoil Mattress, High Density Pocketcoil Mattress, Pocketcoil, Bonnell Coil Mattress, and Coil-less Mattress.

## Bed Frame Canvas Basket

Hanging type storage baskets for under Bed Frame. Because the baskets are suspended from rails, the space under the bed is most-effectively used, even when the bed is placed on a rug.

\* Example combination: mattress is sold separately.  
\* The above picture is a single size walnut bed frame.

## Underbed Storage

Storage with casters. The dividers can separate the storage space into smaller spaces for easier storage.

For example, you can separate the things that you use often with the things that you don't.

\* Example combination: mattress is sold separately.  
\* The above picture is a single size oak bed frame.

### Bed Frame / Underbed Storage

**37285637** Large / Walnut **\$229.00** **37286139** Small / Walnut **\$189.00**

Outside dimensions: W 80 x D 90.5 x H 19 cm  
Inside dimensions: W 76.5 x D 83.5 x H 13.5 cm  
Partitions: 1 large, 4 small

Withstand load: 10 kg

\* A flathead screwdriver is required for assembling the storage case.

## Attaching the bed frame canvas basket and basket rail

It can be used over rugs as it hangs from a rail. Previously, only the space on the front side under the bed could be used, but now you can use the entire space with the rail, and usable space has been increased.

## It cannot be attached to the old model bed frame.

\* Due to the structure of the old-type bed.

Differences between new and old model

(1) Number of wooden springs

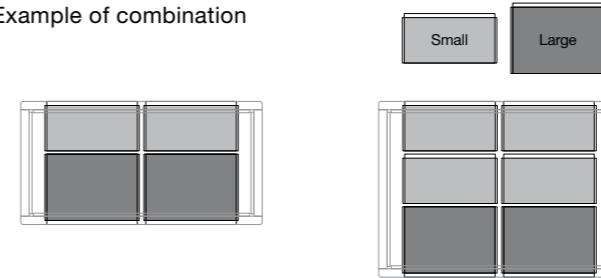

Old: Single 15, Semi-double and double 30

→ New: Single 16, Semi-double and double 32 \*Small is unchanged

(2) Underside of steel frame

Old: No attaching for Bed frame canvas basket → New: Attaching for Bed frame canvas basket for Bed Frame Canvas Baskets

## Example of combination

\* The characteristics of natural wood, such as the colour and grain pattern, may vary in appearance depending on the material.

\* To ensure the long term use of your bed frame, please use a bed mattress that provides superior body weight distribution. Do not use a futon directly on the bed frame as doing so can cause damage to the frame or cracks in the boards.

\* The cover may shrink due to dry-cleaning and washing.

## Mattress With Legs (Washable Cover)

This simple bed was born from a meticulous pursuit of sleeping comfort and quality materials. The Pocket Coil Mattress With Legs adopts a full wood spring design while the Bonnell Coil Mattress With Legs features increased coil height for enhanced sleeping comfort.

### Bonnell Coil Mattress With Legs

The interior mattress is covered by nonwoven fabric, which allows you to rotate the mattress or change the parts easily, leading to a longer product life.

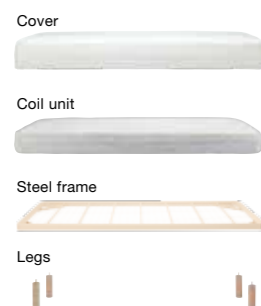

\* Combination example with Legs For Mattress With Legs / Brown

### Changeable cover (shell) and coil unit

The legs, steel frame, and coil unit can be separated from each other, and everything is covered by the cover (shell) using hook-and-loop fastener. Each of the parts is individually sold, so you can lower the impact on the environment by changing only worn-out-parts and separating parts for recycling.

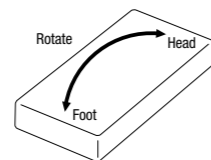

\* Steel frames are not sold separately.

### Rotate the mattress for longer life

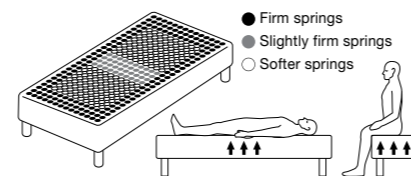

Switch the head and feet side every season. The strength of springs may deteriorate if a load is continuously applied to the same point. By changing the mattress orientation and distributing your body weight more evenly over time, you can reduce the load on the springs.

Make sure to periodically air the mattress by standing it up. Moisture may build up inside the mattress if it is always kept on the bed frame, possibly leading to the formation of mould.

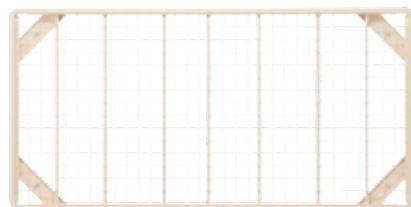

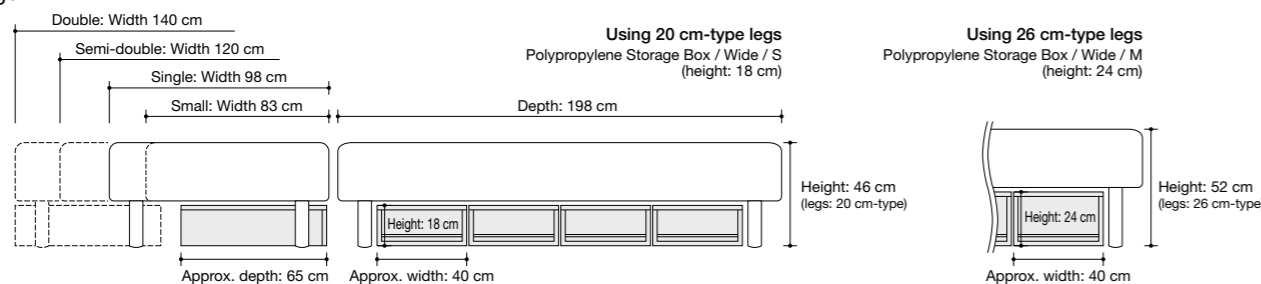

### Well-balanced placement of pocket coil springs

Slightly firmer springs are used in the lower-back area for extra durability. Even firmer springs are used around the edges to support body weight when sitting. Softer springs are used in the wide area that supports the body. The springs with three different levels of firmness are placed appropriately for each function.

\* Storage boxes cannot be inserted if 12 cm-type legs are used.

### Underbed storage for mattress with legs

### Bonnell Coil Mattress With Legs / Steel Frame Type

**37497788** Single **\$309.00**

W 98 x D 198 x H 26 cm

\* 12 cm or 20 cm legs can be selected for the price shown under "+ Wooden legs."

[Machine washable (in laundry net)]

Mattress is designed to fit into a steel frame, which provides improved cushioning effect for a better sleeping comfort. The mattress features a perfect firmness for both sitting and sleeping.

\* Use a laundry net when machine-washing the cover. The capacity of washing machine must be at least 8 kg.  
\* The size may vary depending on the individual product.

### Legs For Mattress With Legs / Set of 4

**15296972** H 26 cm / Natural **\$39.00**  
**1 47462203** H 20 cm / Natural **\$33.00**

The addition of the 26 cm-type to the lineup offers a storage space under the bed. MUJI's 24 cm-high polypropylene storage units can fit in under the bed.

\* This product can be used with both Pocket Coil and Bonnell Coil Mattresses.  
\* This product can be used with most older models of Mattress With Legs. Please ask our staff at any MUJI store for details.  
\* The 26 cm-type is compatible with all steel frame sizes. The wooden frame (older model) only supports the Small and Single sizes.

## Oak Bed

MUJI's assembly-type oak beds feature a beautiful wood grain. The basic design never loses its lustre. The frame uses robust laminated lumber.

\* Example combination: mattress and clock are sold separately.

### Oak Bed

**37285248** Single **\$699.00**

W 100 x D 202 x H 74 cm

The headboard is angled to fit your body when you lean against it. The lower part of the head board has a certain depth so it can be used for clocks or other items.

Bed board

### Materials are carefully selected for your long-term use.

The square wood pieces used for the Oak Bed legs are produced by pasting together three 1-inch (approx. 2.5 cm) wood boards that are commonly available to make a square block. This way, resources are economically and efficiently used, which also contributes to the reasonable prices. MUJI's beds, made with durable materials, can be used for a long time.

Wood boards are pasted together to make a stronger, square block.

### Also designed to let you sit back and relax.

The upper part of the headboard is angled to support your body when you lean against it, and the lower part is deep enough to hold items such as a clock.

◆ To ensure the long term use of your bed frame, please use a bed mattress that provides superior body weight distribution. (When using a futon mattress on a bed frame, your body weight is applied directly to bed board, which can eventually lead to problems such as cracked bed board.)

\* Due to the use of natural wood, the colour of each product may slightly vary. The colour may also appear differently under different lighting.

\* Due to the nature of the material, oak may have a unique pattern called "tiger grain." \* The characteristics of natural wood, such as the colour and grain pattern, may vary in appearance depending on the material.

# Storage Bed

This single bed features a storage space equal to that of two wide 4-drawer chests. Store everything from daily-use clothing to suitcases and comforters.

## Bed + Storage

MUJI renewed its under-bed storage for a more efficient use of the room. The bed provides a larger storage space by adopting a structural design in which the mattress is supported by the storage boxes themselves.

Bed board is made of wood slats that reduce the dust getting into the storage compartment.

## Storage Bed Additional Box / Storage Bed Headboard

An additional box allows you to place a 210 cm-long futon on the bed, and a head board with a simple design can be separated from the wall.

3  
 Often-used CD's and paperback books can be stored in the Additional Box. Adding the box allows you to use futon on the bed frame.

\* Example combination: mattress and pillows are sold separately.

# Mattresses

Five kinds of coil mattress and a non-coil mattress are available to suit the type of comfort that you desire.

The coil mattress is a mattress with well-considered functions of core materials.

Non-coil mattress consists of only natural materials which provide a great sleeping comfort by bringing out the features that materials originally hold.

## Spring mattresses with five types of comfort.

MUJI spring mattresses use the minimum required amount of filling material, such as urethane foam, in order to maximise the comfort provided by the coil springs. The comfort levels vary depending on the number and thickness of coils. The non-woven fabric wrapping the coils is highly breathable, preventing moisture from becoming trapped inside the mattress.

### Mattress with numerous coils that ensures a stable sleeping posture

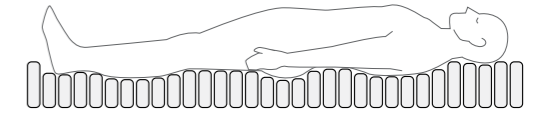

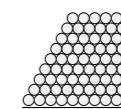

The increased number of coils enables the mattress to more evenly distribute your body weight, reducing the pressure on your spine and lower back. The coils work together to conform to the shape of your body, providing a well-balanced and stable posture for longer periods of time.

Coil arrangement (staggered)

### Mattress with independent coils that evenly supports body weight across many dots

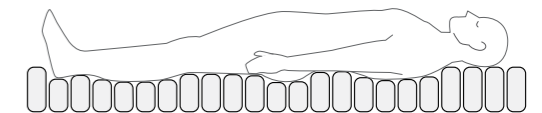

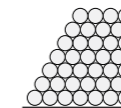

This mattress is constructed with a dense arrangement of independent coils that function as numerous dots to hold your body weight and provide well-balanced support. The mattress ensures a stable posture and reduces the amount of wobble and sinking.

### A coil-less mattress made from nature.

Materials have been carefully chosen for this mattress, and it is made from wool, latex, coco fibre, and cotton. The structure takes full advantage of the materials' features, giving you a comfortable sleep. A specification which enables easiness to fall into sleep and to turn over during sleeping was the focused point of development.

Double / Queen / King

#### Carefully selected materials

##### Wool

We selected wool from among French-produced wool that is bulky, resilient, well-aerated due to plushness. It is also highly moisture-wicking as it is made of thick fibres.

##### Cotton

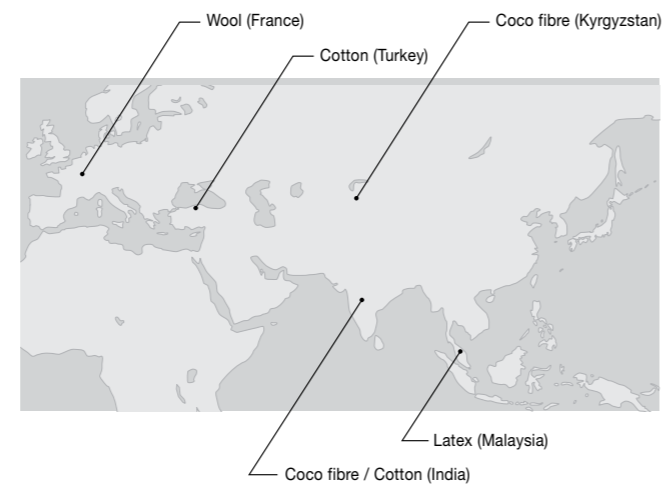

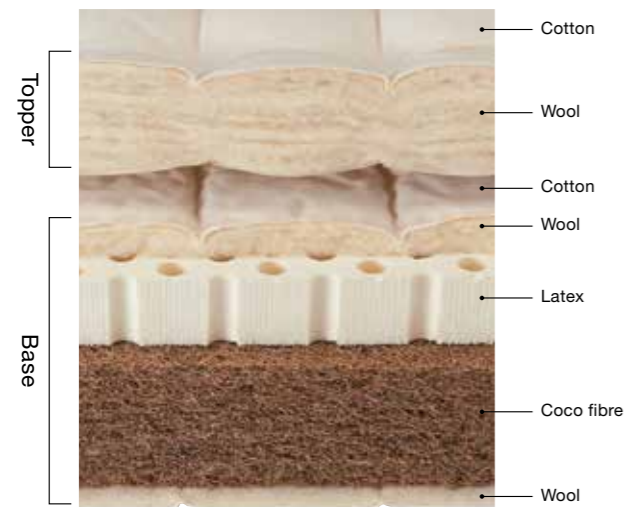

With long fibres, it is soft on the skin with minimal fluff, and features a great strength and constant quality.

##### Latex

High-quality latex made in Malaysia, a major manufacturing place of natural rubber, is used. The latex features incredibly high resilience and durability.

##### Coco fibre

In India, coconut is called "the Tree of life" as every part of the coconut is used, including root, trunk, leaves, and fruit, and cultivated over 4,000 years. It offers durability and ventilation.

#### Bed mattresses that ensure the long life of your bed frame

To ensure the long-term use of your bed frame, it is recommended that you use a bed mattress that provides superior body-weight distribution. When using a futon mattress on a bed frame, your body weight is applied directly to the bed board, which can eventually lead to problems such as cracks.

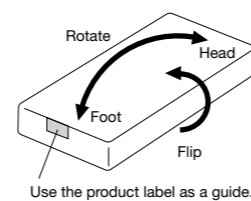

#### Mattress pad that protects your mattress and absorb perspiration

Because the mattresses are designed for use with mattress pads, no quilting is incorporated into the surface, and emphasis is placed on providing an evenly distributed level of strength in the springs and filling materials. Make sure to use a mattress pad to protect your mattress and absorb perspiration.

#### Precautions

Make sure to periodically ventilate the mattress by standing it on an end. Moisture may build up inside the mattress if it is always kept on the bed frame, possibly leading to the formation of mould. Also, make sure to rotate the head/feet and flip the mattress over. The strength of springs may deteriorate if a load is continuously applied to the same place. By changing the mattress orientation and distributing your body weight more evenly over time, you can reduce the load on the springs.

\* To prevent the mattress from sagging unevenly, make sure that your weight on the mattress is distributed evenly over time.

## Bed Pads

Choose from a variety of bed pads to suit your preferences.

Our selection ranges from thick pads that provide excellent cushioning, to those made with natural materials that provide excellent moisture absorption and dissipation. The bed pads are machine washable, ensuring that you can always keep them clean.

## Futon Mattresses

Futon mattresses to choose from to suit your preference. From items with the shape of the urethane devised to pursue comfort, items that can be washed in a washing machine, and items made using natural wool.

### Urethane mattress ensures you a comfortable sleep

Cutting the urethane foam to create protrusions and recessions creates a comfortable futon mattress which supports the body at points. The outer shell can be taken off for washing which enables clean use.

### Profile Urethane Foam Cutting Futon

Bed Frame P70

All for a comfortable night's sleep.

Launched in 1991, the Mattress With Legs continues to be popular after all this time. This product moves beyond conventional concepts, creating a bed by simply adding legs to the mattress. This is the essence of MUJI—a streamlined product that offers exactly what you need for a good night's sleep.

We brought the basic concept of our beds to our Bed Frame, as well. The Bed Frame in a simple design can be combined with an optional headboard, detachable legs, and under-bed storage products to suit a variety of purposes and styles, creating just what you want and need. The small size bed fits together seamlessly. Use them separately or place two side by side for a queen size.

In sizes and specifications designed for different uses, the Bed Frame can be combined and rearranged to adapt as your needs change over the years.

In addition to coil mattresses, MUJI offers the Coil-Less Mattress that features natural materials. Using wool with its excellent ability to absorb and release moisture, we add latex made from natural materials and coconut fibre to not only ensure a good night's sleep, but also to reduce its environmental impact. MUJI uses organic cotton in bedding covers to protect the people who manufacture our products, as well. Natural fibres and fabrics are another great way to get a sounder, more comfortable night's sleep.

“Why not experience the comfort of sleeping in a bed built to your specifications?”

## SOFAS & LIVING ROOM FABRICS

### Flexibility in style gives more comfort.

Life is certainly not a repeat of the exact same thing, day after day. Your taste changes, and you create new habits through time. Over the years, you may move to a new place; your family may grow; kids may leave home. MUJI's vision is to create products that flexibly correspond and embrace the changes of lifestyles.

We all spend a lot of time in the living room, and this room too can be transformed simply by changing the furniture or fabric. Instead of facing each other, place

sofas back to back to create a new area in the room for relaxing. Sofa covers do not necessarily need to be a single colour. The most important thing is creating a calm and comfortable space where everyone can relax every day. You may find inspiration from your life now to create your ideal home.

### A sofa created from the voices of our customers

At MUJI, we promote a way of manufacturing that the voices of our customers are reflected in the product development. This "beads sofa" is one of the products that have been created as a result of such manufacturing project.

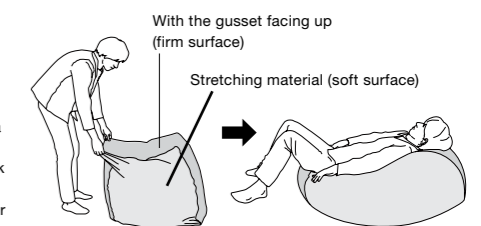

### Sitting on a "vertically placed" sofa

The sofa wraps around the lower back and neck to support any posture that one wishes to relax in. Perfect when reading or watching TV.

### Sitting on a "horizontally placed" sofa

The sofa spreads in a circular manner to allow the body to sink in deeply and be supported. Perfect for taking a nap.

\*1 During the course of use, the beads may settle and cause a slight variance in thickness. \*2 The sofa cannot be used alone. Be sure to use it with a cover.  
 \*3 The Beads Sofa cannot be washed.  
 \* Slight shrinking of the cover may occur by dry cleaning.

# Unit Sofa

These sofas are carefully designed for seating comfort and can be freely combined into a variety of configurations.

The seat cushions are constructed from a concave moulded urethane base topped with a bag stuffed with crushed urethane foam, for plush seating comfort.

The units can be combined to create a sofa set for a large living room, or they can be used individually as a compact sofa. You can freely select the combination that best suits your lifestyle and living space.

## Sofa modules that can be mixed and matched to fit your lifestyle

Whether you want to use a single module as a roomy seat for one person, or combine multiple modules to use as a complete sofa, you can select a combination that fits your living environment.

## Living Dining Series

Living comfortably in a compact space. These products have been developed based on such concept.  
A table with a depth of 80 cm for dining is also available.

### Table with height of 60 cm that makes your room feel spacious

# Sofas

One can choose a preferred comfort from a selection of down feather, feather, and urethane. Parts can be replaced which enables use over many years. The down feather type is a sofa that is filled with down feather and is comfortable to sleep on.

## Feather Cushion

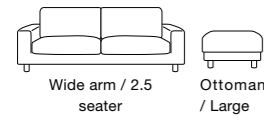

This sofa combines the soft cushioning of feathers for the back and stable, also-used-for-bed pocket coils for the seat. Sitting on the sofa feels like being surrounded by comfort.

Back: Urethane + feather (mixed with urethane)

Seat: Pocket coils + feather (mixed with urethane)

\* The legs can be selected from either natural or brown.  
\* Refer to P162-163 for our lineup of covers.

Sofa / Feather Cushion / Ottoman / L  
**37408104** **\$369.00**  
W 77 x D 54.5 x H 40 cm (with legs attached)

By adding an Ottoman / L to Sofa, the Ottoman can be used not only as an ottoman but also to make an 1-seater or regular sofa possible to use as a bigger couch. Greater variation in combinations increases the range of how the sofa can be used which makes it perfect for use over many years.

## Urethane Foam Cushion

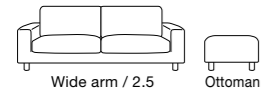

A kind of urethane cushions for firm comfort. This item uses urethane that has a perfect firmness for sitting on. The urethane cushions in the back and seat surface that are not too soft will firmly support one's body, making it easy to stand up and sit down.

\* Down/feather products may have a smell immediately after purchase or in seasons with higher humidity. In such cases, use your hands to push out the air that smells to replace it with fresh air and use the product after leaving it for 3 or 4 hours in a well-ventilated area.

\* The fabrics used with down feather and feather products are finished with a treatment which prevents the filling from coming out. Refrain from sticking a needle or safety pin. Some feathers may come out from the seams. A small amount will not affect use.

## Headrest

An optional part for those who wish to enjoy the comfort of a high-back sofa. This can be easily installed by simply inserting the part into the main body.

### Sofa / Headrest

1 **76580690** W 77 cm for 2.5 seater **\$89.00**

Simply attaching the headrest will convert the Sofa into a high-back sofa to lean on. Be sure to use this item with the separately sold cover.

\* The headrest unit cannot be installed on the older models of Sofa / Wide Arm (2007) and Sofa (2005).

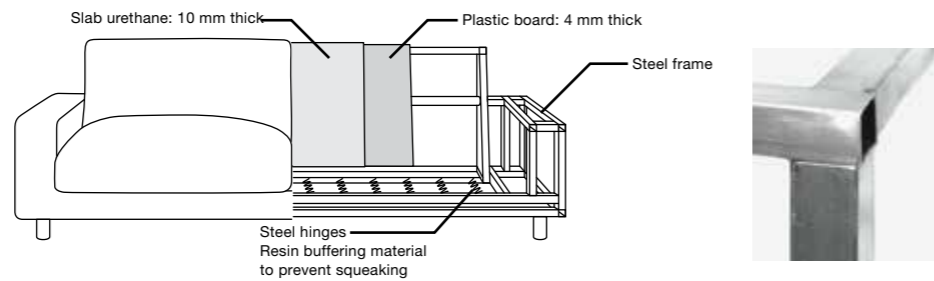

## Ensuring long-term, comfortable use

The back cushions and seat cushions are available as separate parts. With the ability to remove and replace cushions when they become compressed, you can ensure long-term, comfortable use of your sofa. Covers are also sold separately, enabling you to choose the types that you desire. The covers can also be removed and dry-cleaned if they need to be cleaned.

## The structure of the frame

The use of a steel frame structure provides strength and sturdiness. Another amazing feature is the comfortable seating provided by the cushions, which have been painstakingly designed and redesigned to perfection.

## Lounge Sofa

A sofa that can be reclined easily with a touch of a lever and in which you can relax.

Unit Sofa P94

Furniture is a serious purchase, and sofas are especially so. Not only are they a large expense, but the sofa that works for you today may not always suit your life and family. MUJI's Unit Sofa is designed specifically to give you more freedom and versatility than a typical sofa can.

The Unit Sofa includes armed and armless modules that can be arranged and rearranged to create a variety of combinations. This line includes modules in two different widths and depths, as well as ottomans. These few pieces arranged in various combinations are great for furnishing rooms of any size and can be rearranged to adapt to changing tastes and lifestyles for years of long use. The arms on the armed modules can be moved to either side. MUJI's versatility comes not from adding things, but

from subtracting the unnecessary for greater flexibility.

MUJI carefully formulates manufacturing processes to achieve a sofa that looks great and also feels comfortable. The cushions are constructed to provide the most comfortable support and to resist wearing even after years of use.

Urethane chips provide even more cushioning for plump, soft seating.

The larger model with its deeper seat gives you even more room to relax in whichever position is most comfortable for you.

Our aim is a sofa that blends quietly with any lifestyle and integrates naturally with any space. MUJI helps create just the right space for you.

“Adapts seamlessly as your space and lifestyle changes.”

## TABLES, CHAIRS & DESKS

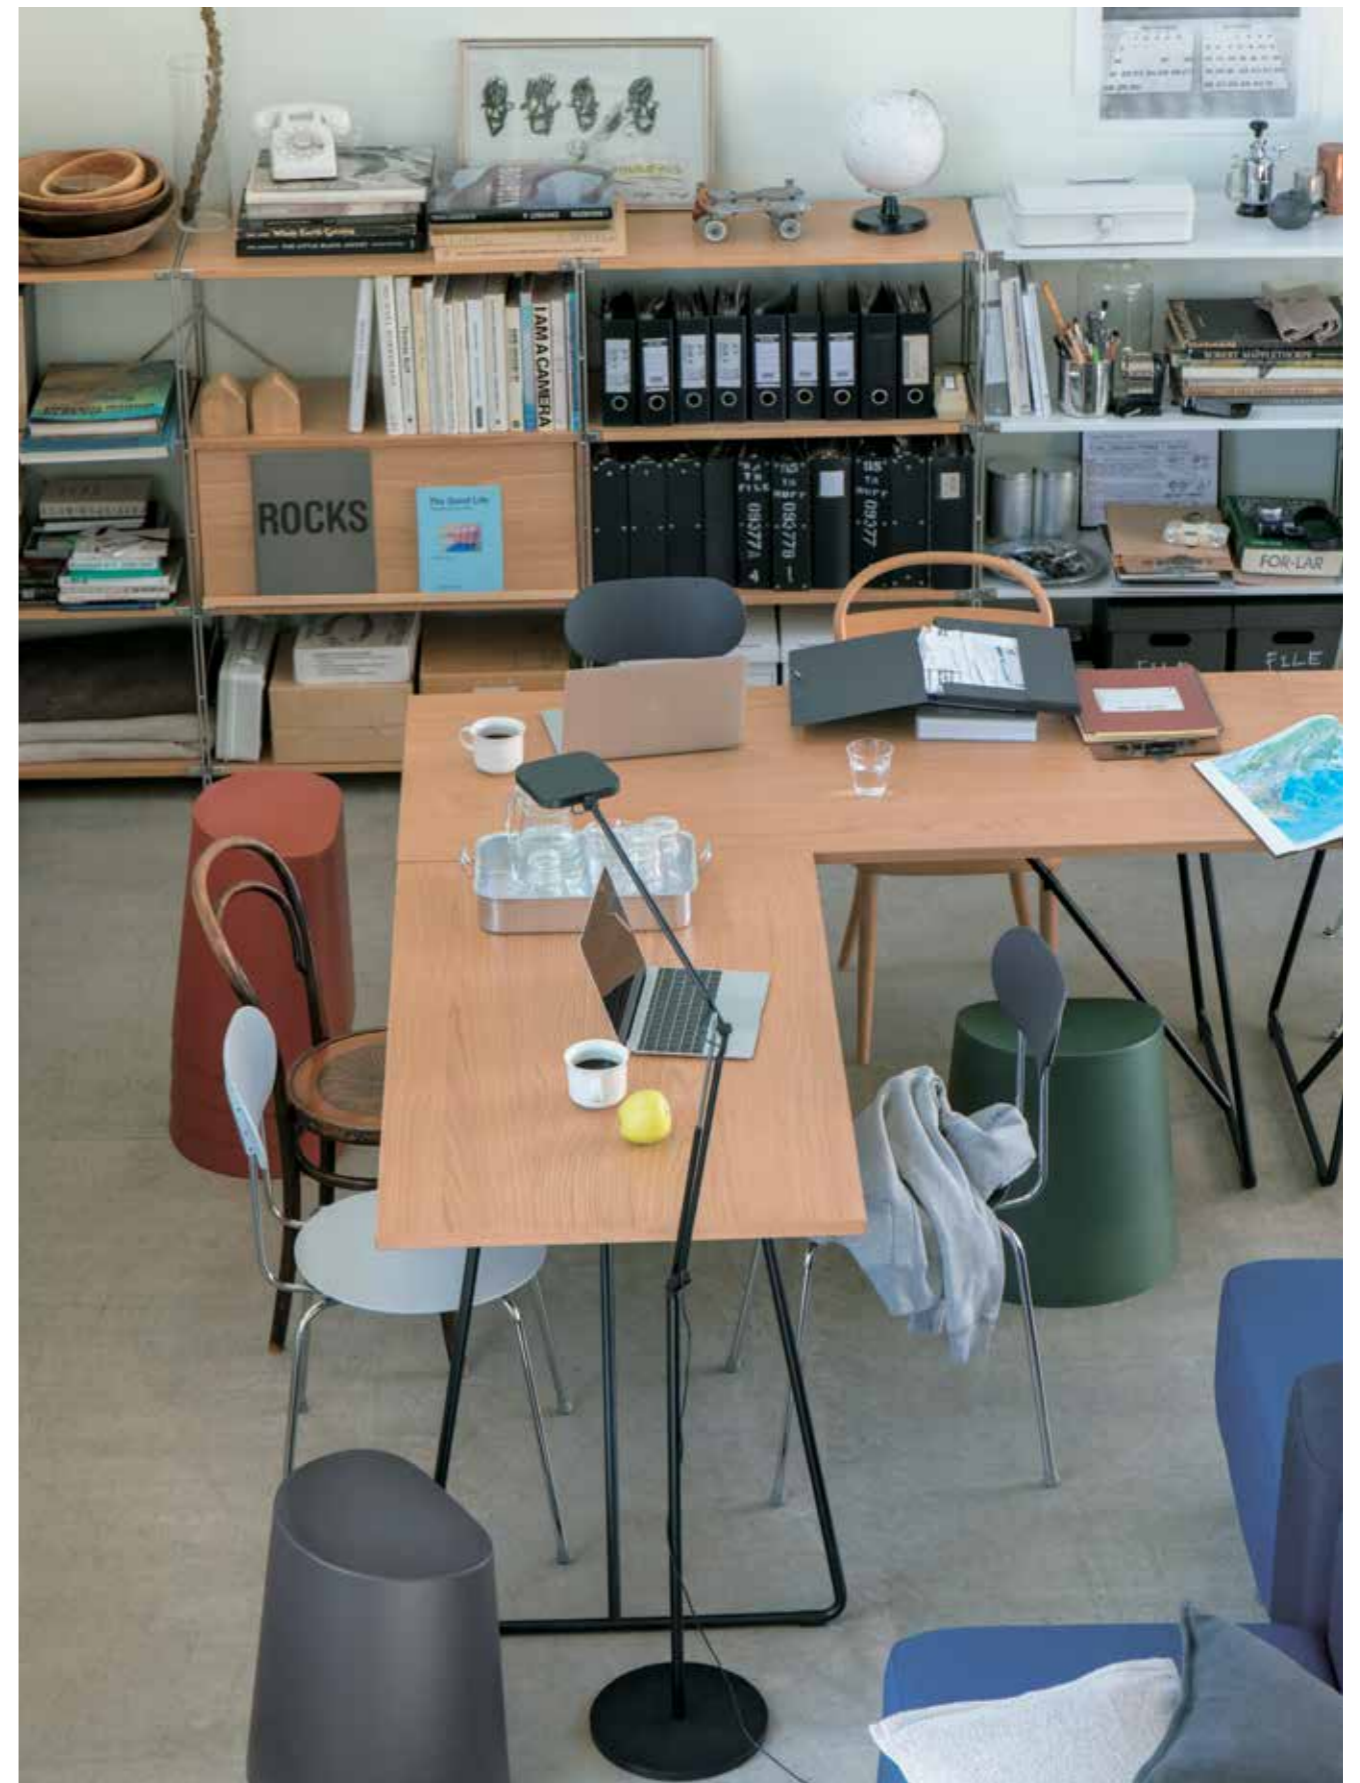

### Furniture becomes a part of the family.

Of the numerous items of furniture that we all use daily, the chair is undoubtedly the piece of furniture whose design has evolved the most. Today, people use stools for short breaks, dining chairs for meals, and lounge chairs for enjoying a little solitude. The chair is a functional extension of one's body and a compelling focal point of a room even when it is empty.

Tables and desks create the setting for a lifestyle together with chairs. The centerpiece of the table is the

friends and family who gather around it. This is a space like no other in the home. Desks, too, are a valuable space where people engage in work and concentrate on the tasks at hand.

MUJI furniture is not designed to be flashy. Rather, these pieces are made to age beautifully as they are used and enjoyed. MUJI creates quality furniture pieces that over time become part of the family and home they fill.

### Furniture that can be used for a long time

Our furniture efficiently uses oak that needs to have grown for nearly 100 years, and is made without nails or screws so that you can use it for just as long.

We paid close attention to the shapes of our furniture; oval shape of the table allows people to gather around even when there is more-than-usual number of people, and chairs with shapes that allow you to sit, stand, and change position with ease.

A bench in the shape of a traditional bench that has been in use in China since old times, is compact and applicable to multiple purposes.

## Oak

As used for furniture and whiskey barrels since old times, oak which is hard, solid, and durable is a perfect material for long-lasting furniture.

The delicate and soft expression creates furniture with mellow impression. Patterns called "tiger grain" which resemble the pattern of a tiger and its delicate and gentle grain are characteristics of oak. The look of oak is enhanced as the material ages over time.

\* We recommend using placemats and coasters when dining.

\* Due to the use of natural wood, the colour of each product may slightly vary. The colour may also appear different under different lighting.

\* Due to the nature of the material, oak may have a unique pattern called "tiger grain."

\* The characteristics of natural wood, such as the colour and grain pattern, may vary in appearance depending on the material.

\* Withstand loads are calculated based on evenly distributed weight.

## Folding Table Stackable Stool

This table and stool set has a simple, minimalist design. Because the table's legs fold up and the stools can be stacked, you can make the best use of limited spaces.

### Folding tables designed for both individual and combined use

The simple design of the folding table makes it suitable for use in any location. The ability to use a single table by itself or multiple tables in combination provides additional versatility. When folded, the table has a thickness of 10 cm, enabling you to store it neatly away when not in use.

### Stackable stools designed for seating comfort

Stackable stools feature a concaved seating surface, and they are designed to reduce fatigue even when sitting for a long time. In addition, polyethylene caps are attached to the inner surface to prevent scratches when stacked.

### Natural wood is our new furniture standard.

Natural Wooden Table Bench P115

Since 2014, MUJI has gradually added more and more pieces to our Natural Wood furniture series. Tough and durable, oak is the most common furniture wood in Europe and North America, and white oak tables and benches take on the distinctive qualities of this wood, as well.

MUJI uses white oak grown in Appalachia, where the lumber is especially suited to furniture. Enjoying a climate and calcic soil in which forests thrive, Appalachia has long been known for its high-quality oak.

This is a well-managed forest industry with a firmly established cycle of oak tree cultivation, logging, and natural growth. Maintaining and protecting this cycle is important in keeping forests healthy and ensuring there is no risk of harm to nature. MUJI visits these forests, secures reliable procurement channels, and gives consideration to environmental protection.

Natural wood furniture is more easily scratched than furniture with veneer finishes, and it changes colour over time. More and more, though, people are coming to value the quality of natural wood and to appreciate these gradual changes in their furniture. Maintaining natural wood as it changes over the years creates an even deeper connection with the furniture, encouraging long years of use. Because it tends to be thicker and heavier than furniture with veneer finishes, MUJI focuses on refined, well-balanced designs in sizes that are easy to use.

These pieces bring respect for nature and its value into the home and blend naturally into daily life. MUJI remains committed to this standard of craftsmanship.

“Furniture that ages well comes to be appreciated.”
