

Note: Take the casters off before assembling.

How to remove the top board

- Remove the drawers.

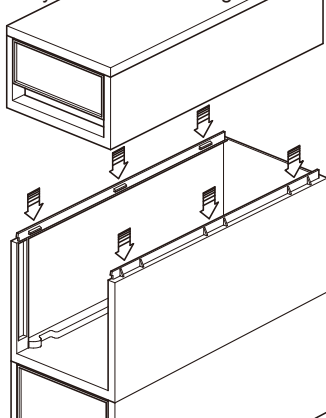

- Pull the tabs attached to the both side of the top board and push them internally and up.

- When the back part of the top board is removed, remove the whole top board by pulling it forward.

How to attach the additional stockers

- Remove the top board (When putting additional stocker on the bottom, remove top board from the additional stocker)
- Confirm the latches on the 6 places then fit the unit into them firmly until you hear the clicking sound.

*It is not possible to put the additional stocker in the middle because of the way the product is structured.

⚠ Caution

- * Do not put it close to a heater or place any heated items such as pans on the unit.
- * Do not sit on it or use it as a step stool.
- * Do not use a hammer to assemble it, or it may break it.
- * Assemble the unit on a flat surface laying down a rug or a cloth so it does not scratch the floor surface.

⚠ Warning

- * It may tip over when the stockers are stacked too high. Please do not stack more than 122cm or 48.8 inches in height.
